Use this step by step guide for best result

Step 1

Start assembling from the lower jaw. Take part **1** from the **sheet 6** and glue it with part **2**. Next, glue the mouth parts (**3-4**), and glue detail **5** on the bottom of the jaws.

Step 2

Glue the lower spikes (**6-7**) and detail **8** between them. Next, glue the tongue (**9a,b,c**) from **sheet 1** and glue it to the lower jaw. Then glue detail **10-11** and set aside.

Assembly tips

Read the instructions carefully before assembly.

Every detail has its own number with large symbols. Follow these numbers for your convenience.

Details with the letters must be glued together. After, paste the finished parts to the figure. Find the part with the signed letter **a** and glue detail in order **a-b-c** and so on.

The nose of the dragon has small polygons. They can be difficult to build if you are a beginner.

Step 3

Start assembling the upper jaw with the tip of the muzzle (parts **12-13**). Glue the nose part **14**. This is the most difficult moment, be as accurate as you can.

Step 4

Glue the parts in order until you reach part **18**.

Step 5

Glue the 2 jaws to each other. Next, glue the eyes (**19-20**) and detail **21-22-23**.

Step 6

Glue second spikes (**24-25**). Glue the remaining spikes on one side **26-28**. And on the other side **29-31**. Glue detail **32** on forehead and set aside.

Step 7

Collect the big horns from pages **2-5**.
The first horn-**33a,b,c,d,e**
The second horn-**34a,b,c,d,e**

Step 8

Connect the horns and head together.

Use this step by step guide for best result

Step 9

Glue detail **35** and detail **36-37** on the sides

Step 10

Glue the central spike **38**. And detail **39**

Assembly tips

For more convenient gluing of the back wall, I recommend to insert it from the inside of the model. Keep the flaps outside.

You can make all the peaks of a different color except the lowest ones

To do this, print sheets **12-13-15** in a different color or use the color of the horns

Some flaps are enlarged for easy assembly

If you want to make model more in size, print the pattern on a3 size paper and scale up to 145%. Enjoy it !

Step 11

Glue the last details of the neck **39-40-41**

Step 12

Cut out the back wall (**42**) of a denser cardstock and paste from inside of the model. the flaps should be on the outside

Step 13

Take a picture of the finished work and share in social networks. Please mark me on the photo [@papercraftfreak](#) and use a hashtag [#papercraftfreak](#)

For assembling. Print this pattern on 23 sheets A4 cardstock 200-300gsm scale 100%

color scheme

sheet **1** eyes and tongue

sheet **2-5** big horns

sheet **6-15** head

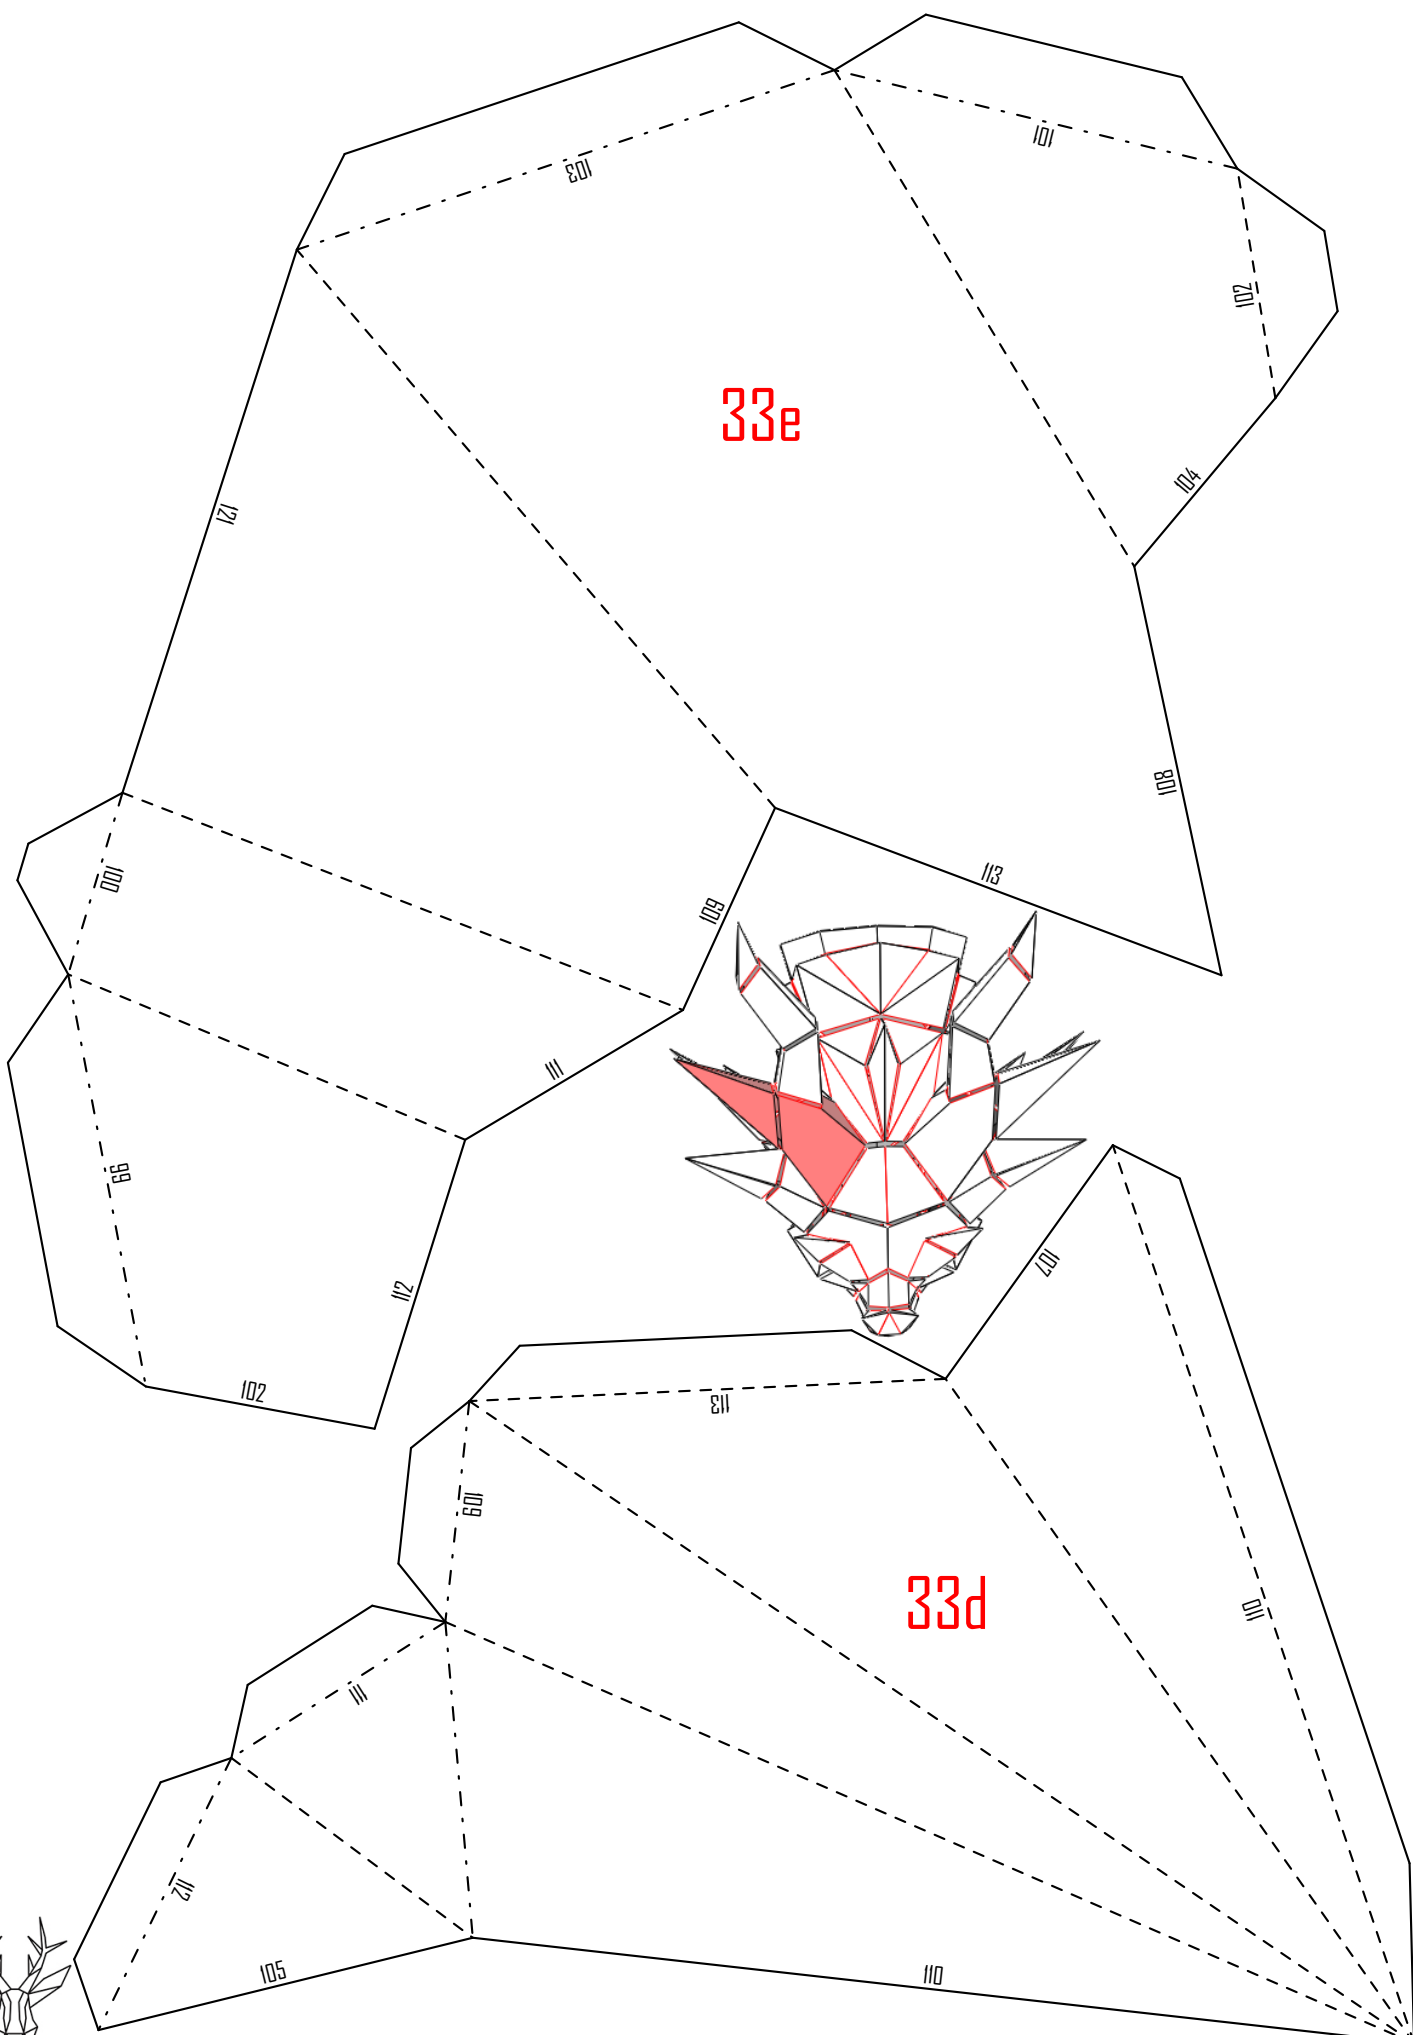

sheet **16-22** neck

sheet **23** back wall

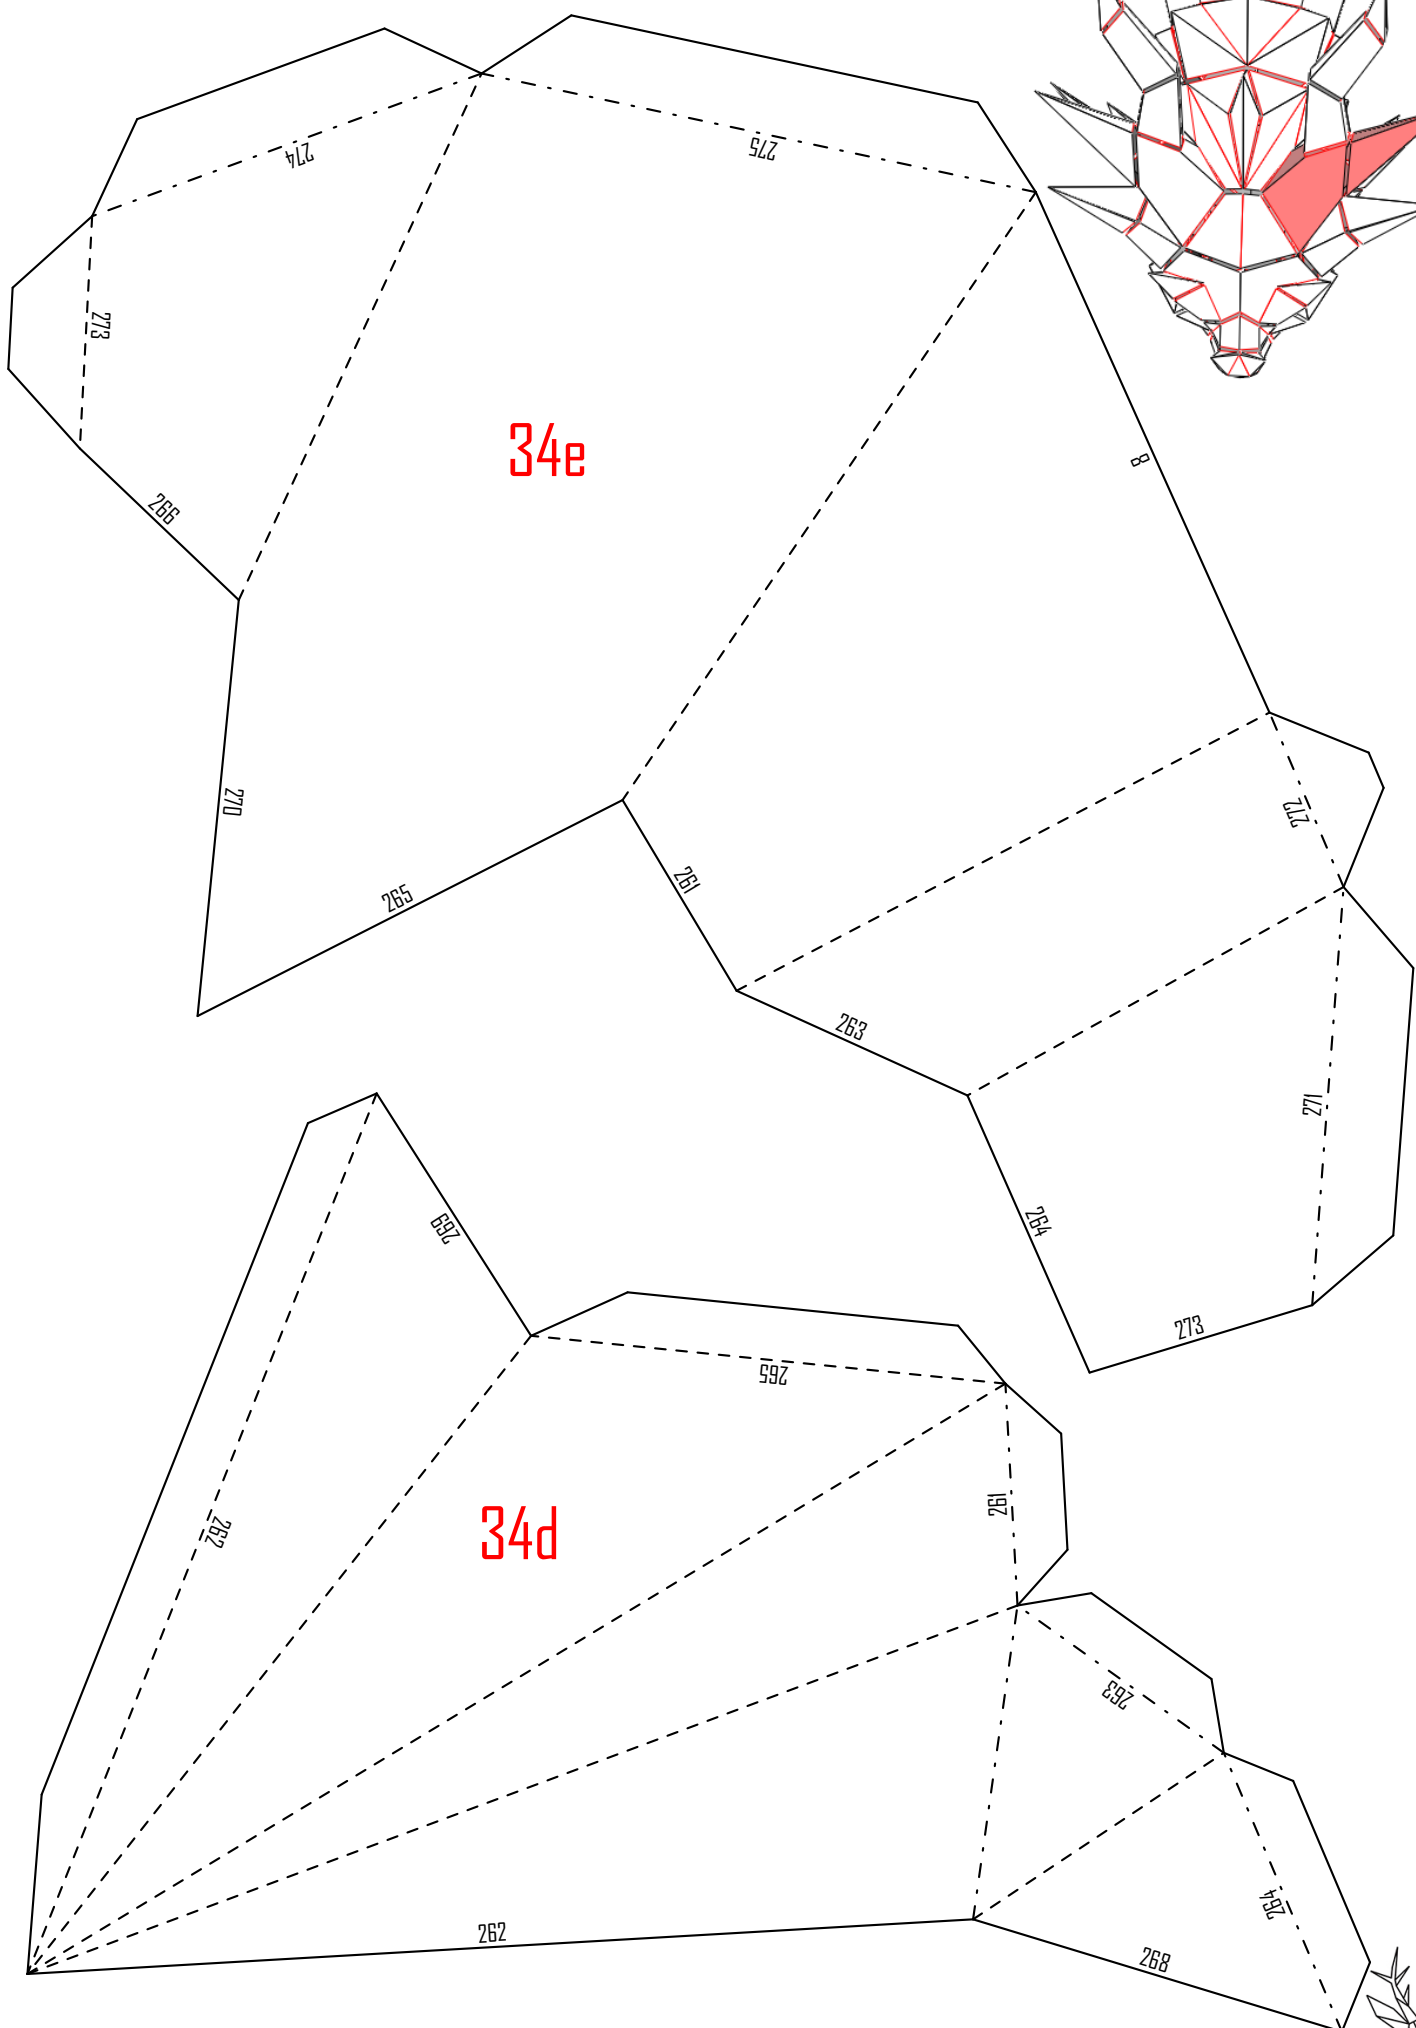

you can use your favorite color
try to experiment!
